Professional Experience

Co-operators General Insurance Company
Data Engineer – Analytics Tools & Data Warehouse

Guelph, Ontario
Apr 2019 - Nov 2024

- Supported production incidents and change management through ServiceNow, resolving 96% of incidents within SLA during on-call rotations.
- Collaborated with cross-functional teams to migrate databases using **SSMS, Java**, and **Azure Data Factory** working with **Azure Synapse** and **Oracle SQL Server**
- Documented 200+ ETL processes in Informatica Cloud and ADF, improving supportability, incident triage, and knowledge transfer across technical and business teams.
- Developed **ETL pipelines** in ADF using **Python** and **Java** processing 300+ data entries daily; improved efficiency by 35% in large volume ETL jobs using multithreading.
- Developed and maintained dashboards to provide stakeholders with real-time visibility into ETL process performance and status.
- Managed and monitored **Change Data Capture (CDC)** processes using **Qlik Enterprise Manager**, ensuring seamless data replication and synchronization across **SQL Server, Azure Synapse Analytics**, and **Informatica** while maintaining high availability and data integrity.

Co-operators General Insurance Company
Software Engineer – Python/.NET/UiPath (Intelligent Automation Team)

- Redesigned a high-volume transactional automation, increasing the success rate from 30% to 96%
- Developed libraries to standardize tracking metrics and improve reliability; 99%+ reliability for metrics
- Developed attended and terminal automations using **UiPath, C#, .NET** and **Python**; 800+ hours saved
- Managed user roles, processes, schedules and configuration changes as a UiPath Administrator
- Implemented the automation documentation standard for Robotics Process Automation.

Co-operators General Insurance Company
Robotics Process Automation (RPA) Developer - eRPA Enterprise

- Designed and developed end-to-end enterprise workflow automations that saved 2,900+ manual hours using **UiPath**
- Maintained high success rates by solving critical errors and maintaining compatibility through system updates for automations migrating 100,000+ entries.
- Visualized ROI metrics using **Kibana** dashboards and **ElasticSearch**.
- Managed the end-to-end stakeholder lifecycle for RPA initiatives, translating complex business requirements from senior management into technical specifications while providing regular progress reports and ROI analysis.

Education

University of Guelph
Bachelor's (Honours), Computer Science

Sep 2017 - Apr 2022
GPA: 3.5

- Graduated with Distinction, on the Dean's List
- Statistics minor

Technical Skills

Languages: Java, C#, Rust, .NET, Python, JavaScript, TypeScript, R, PowerShell, C/C++, SQL (T-SQL, MySQL, PostgreSQL)

Backend & APIs: NET, Node.js, Express.js, FastAPI, RESTful APIs, SOAP, JSON

Cloud & DevOps: AWS, Microsoft Azure, Google Cloud Platform, Git, CI/CD, Docker, Kubernetes, Linux, Windows, YAML, DevSecOps

Databases & Data: SQL Server, Oracle, MySQL, Snowflake, DuckDB, Azure Synapse, LanceDB, SQL Server Management Studio, Oracle SQL Developer

Data Integration: Azure Data Factory, Informatica Cloud, Qlik Enterprise Manager, ETL/ELT, data pipelines, change data capture

Testing & Monitoring: Unit testing, integration testing, API testing, debugging, performance optimization, Kibana, Elasticsearch, Splunk, Dynatrace

Tools & Practices: Visual Studio Code, Jira, Confluence, ServiceNow, UiPath, Power BI, Tableau, Excel, regex, Agile, Scrum, Kanban, technical documentation

AI Development Tools: GitHub Copilot, OpenAI Codex, Claude, Agentic AI tools

Frontend: React, Angular, jQuery, HTML5, CSS3, responsive UI development

Certifications: Microsoft - Azure DP-900, Databricks - Databricks Lakehouse Fundamentals
